

Due to Covid-19 restrictions we have developed a series of essential training via zoom, in order to support staff with key skills and essential training for End of Life.

These sessions have proved extremely popular and we are extending the program for a further two weeks

We are working with Hospice colleagues to support a timetable of training via Zoom.

New topic for June and July include:

Remote Assistance for VOED by HCAs

Managing Breathlessness – series of three sessions, join one, two or all three.

To book on these sessions

1. Staff will need to have access to zoom – you might want to practice with zoom prior to the training to trouble shoot any IT issues.
2. Follow the Eventbrite link to book a place on each session you are interested in,
3. Log on 5–10 minutes before the start of the session (Zoom session log in details will be released by Eventbrite 30 minutes before the session)
4. Have pen and paper on hand to participate in the sessions

These sessions are aimed at Registered Nurses and AHPs
